

Cup Warmer S

Elevate your coffee experience with prewarmed cups

JURA's practical, small cup warmer is the ideal partner to any automatic coffee machine. The cup warmer S keeps the cups inside it consistently at a temperature of around 55 °C. The cover also prevents heat loss, saving energy as a result.

Voltage	220 – 240 V, 50/60 Hz
Power	13 W
Weight (without cable)	approx. 1.07 kg
Cable length	approx. 1.1m
Dimensions (W×H×D)	13.9×19.9×25.8 cm
Article number	24176

Simple, smart, space-saving design

Measuring just 13.9×19.9×25.8 cm, the cup warmer S fits in easily wherever it's placed. All it takes is a switch of the On/Off button to make this simple yet elegant addition to any automatic coffee machine ready to go in no time at all.

Ideal use of storage space

The capacity of the cup warmer S is ideally suited to domestic use, providing space for eight espresso cups (diameter 57 mm), six coffee cups (diameter 66 mm) or four cappuccino cups (diameter 90 mm).

The perfect cup temperature

The cup warmer S keeps the cups inside it consistently at a temperature of around 55 °C. The cover also prevents heat loss, saving energy. With cups prewarmed to the perfect temperature, your speciality coffees will be more aromatic than they've ever been – whether they're a fiery espresso or a creamy cappuccino.
